Support of communities during pandemic, part 2

Access to Internet for vulnerable groups in rural areas during COVID19 epidemic
(Chapterthon 2020)

Project Summary

Several art schools and culture organizations having no computer and Internet will be provided computers and connected to Internet with WiFi routers helping to connect to the Internet school students. It will help to overcome the problem of communication with remote teachers and the ministerial officers. We consider our main goal at the time of Coronavirus is to provide connectivity and access to Internet services to vulnerable groups of people living in rural areas and increasing digital skills for greater inclusion of the entire community to combat the impacts of COVID19.
